

RECYCLING... ..COLOUR BY COLOUR

Door-to-door collection service

The waste collected door-to-door has to be placed in the right bins issued to you. The bin for collection should be left out at the evening before (after 8 pm) the pickup day, following the different calendar for each town.

Separate waste collection area

They are distributed over all the town territory. To dispose your rubbish of, you need to put each of them in the correct container. The rubbish that can't be recycled is collected with the door-to-door system (as told before).

Door-to-door collection service for business premises

The shops, factories and the public institution can use the door-to-door system for all kinds of waste. That's enough bringing container outside, in front of the building, according to the calendar of the town.

*A LITTLE GUIDE
TO HAVE THE BEST
RECYCLING SYSTEM*
